25X1 [redacted] Comments.
 (1) These shipments have been previously reported. [redacted] 25X1
 (2) This shipment has not been determined. Gun shipments to the U.S.S.R. hitherto observed always contained old material discarded by the troops. As, however, the present report mentions new guns to have departed from Eastern Germany, the shipment cannot be accounted for.

25X1 (3) [redacted]
 25X1 confirms the 36th Pan Bridge Regt of the GDF in Magdeburg as being stationed in the Rossau area until 22 July.
 25X1 confirms the 91st Sig Regt [redacted] of the Eighth Gds Army in Weimar until 19 July.
 25X1 has been [redacted] in the Potsdam area.
 confirms the Hq Eighth Gds Mecz Div from Grimma until 29 July.
 is reported for the first time.
 confirms the Hq 19th Gds Mecz Div in Magdeburg or Hillersleben until 30 July.
 was twice observed in Rostock.
 confirms the Hq 207th Mts Rifle Div in Stendal until 30 July.
 probably belongs to an artillery course of the GDF in Strausberg.
 has been the receiver of several shipments of tractors in Bernburg since December 1951. The fact that [redacted] now appears in Aken where the unidentified engineer regiment of the GDF from Bernburg has been assembled for training on the Elbe River since May 1952 leads to the conclusion [redacted] 25X1
 possibly belongs to the tank unit of the engineer regiment. Periodic reports indicated that the tank unit was also transferred to the Aken area in May where it was repeatedly confirmed until early August.
 (4) The motor vehicles belong to elements of the air force and the 7th Gds Mecz Div.
 (5) One Orlishenko (fnu) is unknown in Lieberose.
 (6) Within eight hours of observation daily, a total of 42 cars was handled which, provided that supply traffic keeps the same volume during 24 hours, is a daily volume of 126 carloads or three freight trains. This is an essential increase of capacity compared with previous observation periods namely 59 carloads during the period from 13 March to 11 June 1952 and 60 carloads during the period from 11 June to 9 July 1952. [redacted] 25X1
 This increase is partially due to a more complete coverage of rail traffic.
